### Profile

I am a BSc IT graduate and a Full Stack Developer. I design and develop responsive, user-friendly websites that work smoothly on all devices. I use HTML, CSS, JavaScript, and frameworks like Bootstrap to create clean layouts and interactive web pages. I enjoy turning ideas into real, functional websites with a good user experience. I also have knowledge of Java, SQL, Python, and C.

### Projects

#### 1. EventHub - Event Management System

A responsive event management website using HTML, CSS, JavaScript, and Bootstrap. Includes event listings, event details, user registration, and contact pages. Mobile-friendly and modern UI, with JavaScript-powered interactivity and form validation.

#### 2. Gadwata Tourism Website

Developed using HTML, CSS, Bootstrap, and JavaScript. Includes fort details, image gallery, district-wise information, and responsive layouts.

#### 3. SQL Project - College Event Management System

Designed an SQL database for managing college events, including tables for events, students, registrations, schedules, and admin management.
